

Page 1: Project Overview

Welcome to PDFDesk. Client-side PDF splitter built with iOS minimalism.

Page 2: Executive Summary

All processing happens 100% locally on your device for absolute privacy.

Page 3: Architecture & Tech

Powered by WebAssembly, pdf-lib, and pdfjs-dist without any backend.

Page 4: Split Modes

Extract custom page ranges, visual selection, or split every single page.

Page 5: Live Thumbnail Preview

View high resolution previews of any page instantly in real time.

Page 6: Security & Privacy

Zero bytes uploaded to any remote server. Your confidential docs are safe.

Page 7: Instant Download

Export as single consolidated PDF or compressed ZIP bundle.

Page 8: Performance Metrics

Sub-second page splitting with zero quality degradation or re-compression.
